DETAILED ACTION

Continued Examination

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 9/12/06 has been entered.

Claims 1, 7, 8 & 11-14 are pending examination.

Claim Objections

Claims 12-14 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. The limitations for these claims are already present in the independent claim 1 and therefore fail to further limit the claim.

Allowable Subject Matter

Claims 1, 7, 8 & 11 are allowed. The following is a statement of reasons for the indication of allowable claims: The closest prior art of record, Merritt does not disclose, teach or suggest the distinguishing feature of the opening of the pressure control valve for controlling the pressure of the cathode gas is decreased at an initial stage of the

transition period and thereafter the opening of the pressure control valve is increased following an increase of the cathode gas flow amount.
